

SitnStand – The Everywhere Lift Chair™ is a portable, battery-powered lift cushion that transforms any chair into a safe, supportive seat to assist patients with sit-to-stand transfers during rehabilitation and everyday care.

It is engineered to empower healthcare providers across inpatient, outpatient, and acute care settings. Accommodating a wide range of patient populations and clinical needs, it promotes early mobilization, accelerates rehabilitation, and supports zero-lift protocols for safer patient handling by nurses and therapists.

Built from durable, medical-grade, easy-to-clean materials, SitnStand works with nearly any chair—including wheelchairs—for use in diverse clinical scenarios **everywhere**.

- 
100% Gradual Lift Assistance
- 
Vertical Lift Technology™: No Catapult Lift
