

3D TriSport

3D PEDOMETER

by Realalt

Model: RTS01

(true to size 1:1 ratio)

MORE WAYS TO TRACK PROGRESS

NO SMARTPHONE REQUIRED

The 3DTriSport Pedometer gives users a detailed picture of their daily activity without requiring Bluetooth, an app, downloads or a smartphone.

STEP TRACKING
Monitor total walking and running steps throughout the day.

DISTANCE
View distance travelled in either miles or kilometers.

CALORIES BURNED
Estimate the calories used during daily activity.

EXERCISE TIMER
See how much time has been spent actively walking or running.

30 DAYS MEMORY
Review up to 30 days of activity records and progress over time.

DAILY STEP GOAL
Set a personal target and monitor your progress throughout the day.

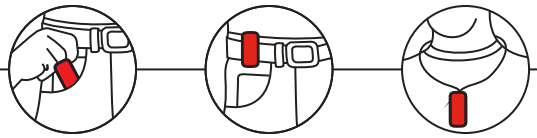

10-Step Error Prevention

To improve accuracy, the pedometer only records activity once it detects 10 consecutive steps in the same direction. This helps prevent accidental bumps, movements, or short bursts of motion from being recorded as steps.

ACCURATE TRACKING IN ANY POSITION

An advanced 3D Tri-Axis Sensor accurately detects movement across three axes, allowing the 3DTriSport to recognise walking and running activity regardless of how or where the pedometer is worn. The sensor continuously interprets movement to provide reliable, consistent step tracking throughout the day.

PLACE IN BAG OR POCKET | **CLIP TO WAIST OR POCKET** | **WEAR AROUND NECK**

IDEAL FOR

- Physiotherapy and rehabilitation
- GP-led walking programmes
- Community wellness projects
- Weight-management pathways

PRODUCT INFORMATION

Product	3DTriSport Pedometer
Tracking Modes	Steps, distance, calories and exercise time
Activity History	Up to 30 days
Additional Functions	Clock and daily step goal
Battery	CR2032 included (no charging required)
Wearing Options	Clip, lanyard, pocket or bag
Available Colors	Black, Gray/Black, Blue, Magenta and White
Warranty	18 months
What's Included	3DTriSport, Clip, Lanyard, Instruction Manual and Mini Screwdriver (for battery replacement)
