An alarm for any location

MAGNETIC PULL-CORD ALARM

One of the most versatile early warning fall management solutions. Patients can be monitored in a bed, wheelchair, sidechair, and in the bathroom. The magnetic switch releases from any direction of pull, making it superior to pull-pin alarms that release from one direction only. The versatility and reliability of the Magnetic Alarm give you and your staff an excellent tool for reducing patient falls and preventing injuries in multiple locations.

#74836 Magnetic Pull-Cord Alarm
